in the tradition of the affluent society and bowling alone a book that will redefine the way americans think about themselves for decades to come america may be more diverse than ever coast to coast but the places where we live are becoming increasingly crowded with people who live think and vote as we do we ve built a country where we can all choose the neighborhood and church and news show most compatible with our lifestyle and beliefs and we are living with the consequences of this way of life segregation our country has become so polarized so ideologically inbred that people don t know and can t understand those who live just a few miles away the reason for this situation and the dire implications for our country is the subject of this groundbreaking work in 2004 journalist bill bishop made national news in a series of articles when he coined the phrase the big sort armed with original and startling demographic data he showed how americans have been sorting themselves over the past three decades into alarmingly homogeneous communities not at the regional level or the red state bluestate level but at the micro level of city and neighborhood in the big sort bishop takes his analysis to a new level in a brilliantly reported book that makes its case from the ground up starting with stories about how we live today and then drawing on history economics and our changing political landscape to create one of the most compelling big picture accounts of america in recent memory

america may be more diverse than ever coast to coast but the places where we live are becoming increasingly crowded with people who live think and vote as we do we ve built a country where we can all choose the neighborhood and church and news show most compatible with our lifestyle and beliefs and we are living with the consequences of this way of life segregation our country has become so polarized so ideologically inbred that people don t know and can t understand those who live just a few miles away the reason for this situation and the dire implications for our country is the subject of this groundbreaking work from publisher description

tragedy in aurora is about the 2012 murder of budding sports journalist jessica jessi redfield ghawi in a public mass shooting and the widening circle of pain it inflicted on

her family friends police medical first responders and others the book is at the same time a deep examination of the causes and potential cures of the quintessential 21st century american sickness public mass shootings at the heart of that examination is an unpacking of america s deep polarization and political gridlock it addresses head on the question of why why is american gun violence so different from other countries why does nothing seem to change the parkland kids inspired hope of change but the ultimate questions stubbornly remain what should what can and what will americans do to reduce gun violence tragedy in aurora argues that the answer lies in a conscious cultural redefinition of american civic order over recent decades america has defined a cultural new normal about guns and gun violence americans express formalistic dismay after every public mass shooting but many accept gun violence as an inevitable even necessary and to some laudable part of what it means to be american although americans claim to be shocked with each new outrage so far they have failed to coalesce around an effective way to reduce gun death and injury the debate is bogged down in polarized and profoundly ideological political and cultural argument meanwhile america continues to lead the globe in its pandemic levels of gun deaths and injuries combined with the cynical learned helplessness of its politicians the result is gridlock and a growing roll of victims of carnage is there a path out of this cultural and political gridlock tragedy in aurora argues that if america is to reduce gun violence it must expand the debate and confront the fundamental question of who are we tom diaz gives a new understanding of american culture and the potential for change offered by the growing number and ongoing organization of victims and survivors of gun violence without conscious cultural change the book argues there is little prospect of effective laws or public policy to reduce gun violence in general and public mass shootings in particular

when it comes to voting taxes environmental regulations social services education criminal justice political parties property rights gun control marriage and a whole host of other modern american issues the state in which a citizen resides makes a difference that idea that the political decisions made by those in state level offices are of tremendous importance to the lives of people whose states they govern is the fundamental concept explored in this book gary f moncrief and peverill squire introduce students to the very tangible and constantly evolving implications limitations and foundations of america s state political institutions and accessibly explain the ways that the political powers of the states manifest themselves in the cultures economies and lives of everyday americans and always will

a us presidential election is quite simply the greatest show on earth in the battle to occupy the most important seat in the world in which power can be bought and sold forces on either side hoodwink the public and claim their political victims witness the age of the palin effect an extraordinary exposé of the political depravities and media proliferated inequalities of the entire electoral process the palin effect sheds light on an ugly phase of american politics hell bent on slander and spurious belittling revealing an increasingly greedy war based on class sex and money former fox news and bbc journalist shana pearlman looks at what motivates the protagonists in the electoral circus the media the people the money the candidates themselves and wonders how free this star spangled land really is

a look at how americans are losing their sense of curiosity and skepticism and how some are working to change that the spirit of inquiry is the engine of democracy the democratic process is nothing less than citizens regularly asking what kind of society they want to live in and whom they want to lead them but more and more people are avoiding the whole messy business of questioning americans are instead being trained to look for ready made answers with potentially dire implications for the health of our

society in this impassioned new book andrea batista schlesinger argues that we re besieged by cultural forces that urge us to avoid independent thought and critical analysis the media reduces politics to a spectator sport focusing on polls and personalities rather than issues and ideas schools teach to standardized tests students learn to fill in the bubbles not open their minds financial literacy courses have replaced civics classes graduating smart shoppers rather than informed citizens even the internet promotes habits that discourage inquiry regurgitating search engine results becomes a substitute for genuine research and reflection social networks promote connection rather than engagement with all the information available online over a third of those younger than twenty five say they get no news on a typical day up from twenty five percent in 1998 the situation isn t hopeless batista schlesinger spotlights individuals and institutions across the country that are working to renew a healthy sense of curiosity and skepticism particularly in american s youth it is at this point an uphill battle but one well worth undertaking the death of why offers both a penetrating socio cultural critique of our current path and a way forward for cultivating inquiry and reinvigorating our democracy from her start in politics as a teenager andrea batista schlesinger has asked the important questions now she asks her most important are we teaching young people to value inquiry and if not what hope can we have for the future of democracy katrina vanden heuvel publisher the nation the death of why makes the case that we cannot create social change without a culture of questioning we should pay close attention to this brilliant contribution deepak bhargava executive director center for community change she asks the right questions at a time when we seem more eager for answers that we don t understand or care about deborah meier senior scholar new york university author of in schools we trust and the power of their ideas and founder of innovative new york and boston area public schools
